-  In Progress/Recent Development

1. DEVELOPER OR SEPTIC CUSTOMER IS RESPONSIBLE FOR NEW LINE(S)/PUMPS NECESSARY TO CONNECT TO SOLID LINES SHOWN ON MAP. DASHED LINES MAY OR MAY NOT BE SUITABLE FOR CONNECTION.
2. WHEN MULTIPLE SEWER LINES ARE NEAR A PROPERTY, FUD MAY DIRECT FLOW IN A CERTAIN DIRECTION TO A SPECIFIC LINE WITH SUFFICIENT CAPACITY FOR THE PROPOSED FLOW.
3. FOR DEVELOPMENT DENSITY GREATER THAN 3 UNITS PER ACRE (600 GPM PER ACRE), ADDITIONAL UPGRADES OF EXISTING LINES, AND ADDITIONAL FEES, MAY BE REQUIRED.
4. PARCELS NOT SHOWN IN GREEN HATCH MAY STILL BE DEVELOPED AND ARE SUBJECT TO THE CAPACITY RESERVATION FEE IF ALL OTHER CRITERIA ARE MET.
5. RED LINES MAY NOT BE CONSTRUCTED BY FUD UNTIL FINANCIALLY AND OPERATIONALLY (FLUSHING VELOCITY) FEASIBLE. A CRITICAL NUMBER OF POTENTIAL CUSTOMERS AS DETERMINED BY FUD MUST REQUEST SERVICE PRIOR TO CONSTRUCTION.
6. RED HATCHED AREA (CHOTO BEND) IS EXCLUDED FROM THE SEWER CAPACITY RESERVATION FEE PROGRAM. CONNECTIONS IN THAT AREA WILL BE HANDLED ON A CASE BY CASE BASIS. AT A MINIMUM, THE SEWER CAPACITY RESERVATION FEE SHALL BE PAID AND REQUIRED INFRASTRUCTURE TO CONNECT TO THE EXISTING SYSTEM SHALL BE BUILT SEPARATELY BY DEVELOPER(S) OR SEPTIC CUSTOMER(S)
